## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 2. Claims 1-2 and 4-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tasaka et al., 7,053,145 B1 (Tasaka) in view of Japanese Patent Publication JP07-207109, machine translation.

Tasaka teaches a flame-retardant resin composition essentially of the type contemplated by applicants comprising a base resin which contains a propylene resin and a thermoplastic resin that can be polymethylpentene, a metallic hydrate, antioxidants of the type contemplated by applicants, and a metallic oxide as required by claim 1-2 and 4. See entire document, and for example abstract, column 10, lines 4-10. In addition, the metal hydrate, oxide and antioxidants are of the type set forth by applicants in present claims 5-7. Tasaka teaches that his composition can be used to product insulated wires and covering materials for wiring materials, which would render obvious the wire harness of instant claim 9. See column 19, lines 9-24. Tasaka does not specifically teach the inclusion of a sulfur antioxidant. The publication teaches the formation of a plastics material using a phenolic antioxidant, a phosphorus antioxidant and a sulfur antioxidant, wherein the plastics such as a propylene resin containing at least 75 wt% and polymethylpentene are mixed. See entire document and for example [0028] and [0058]. The publication teaches that the antioxidants help control the oxidation degradation. It would have been obvious to one having ordinary skill in the art to modify the teachings of Tasaka by including a sulfur antioxidant to aid in controlling oxidation degradation during formation of the resin composition.

Therefore, the combined teachings of Tasaka and the publication would have rendered obvious the invention as claimed in present claims 1-2 and 4-9.

## Response to Arguments

3. Applicant's arguments with respect to claims 1-2 and 4-9 have been considered but are most in view of the new ground(s) of rejection.

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jill Gray whose telephone number is 571-272-1524. The examiner can normally be reached on M-Th and alternate Fridays 8:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Keith Hendricks can be reached on 571-272-1401. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
